Organ Cave, WV

ORGAN CAVE

—“THE GREAT NATURAL WONDER OF THE VIRGINIAS”—

GENERAL LEE'S UNDERGROUND AMMUNITION HDQS.

About $\frac{3}{4}$ -mile from the Entrance of the Cave is located the Wonderful Organ, from which the Cave takes its name. The Organ is formed of White Stalactites and is an exact reproduction of a large Pipe Organ—by striking on the different pipes, notes and tones of remarkable strength and purity can be produced.

Many other formations are to be seen, resembling different objects. Good walk-ways lead to all interesting points in the interior.

Substantial and Permanent Walks and Steps give Explorers easy access and afford every comfort

GEORGE A. CARTER—OWNER

In another part of the Cave the Saltpetre Works of the Southern Confederacy were located, and the wooden hoppers and troughs remain there—now, just as the Confederate Soldiers left them during the Civil War.

These points are reached easily after passing through many long, Subterranean Avenues, and Vast Underground Auditoriums,—along the Shores of Miniature Lakes and within earshot of Underground Niagaras.

The Cave is lighted by electricity.

Autos may be Driven Direct to the Entrance of Cave, near Approach thru Gate on Main Road

CELEBRATED CAVERN 3 MILES SOUTH OF RONCEVERTE
ON THE SENECA TRAIL--U.S. ROUTE 219--5 MILES FROM U.S. 60--GREENBRIER COUNTY, W. VA.
